Safety Data Sheet

1. Identification

GHS Product Identifier: PARAFFIN OIL
Company Name: CHEM-SUPPLY PTY LTD (ABN 19 008 264 211)
Address: 38 - 50 Bedford Street GILLMAN
SA 5013  Australia
Telephone/Fax Number: Tel: (08) 8440-2000
Fax: (08) 8440-2001

Recommended use of the chemical and restrictions on use:
Medicinal, disinfectants, cleaning agents, lubricants, cosmetics, food/foodstuff additives, polymers, textile processing, corrosive inhibitors, hydraulic fluids, metal-working, offshore drilling, fuels, agriculture, pesticides, fertilisers, printing inks, paints, lacquers, varnishers, floor treatment and laboratory reagent.

Other Names:
- PARAFFIN OIL Light 15 LR
- PARAFFIN OIL Light 15 BP
- PARAFFIN OIL Heavy 68 BP
- PARAFFIN OIL Heavy 68 LR

Mineral oil, Liquid paraffin, White mineral oil

Other Information:
EMERGENCY CONTACT NUMBER:  +61 08 8440 2000
Business hours: 8:30am to 5:00pm, Monday to Friday.

Chem-Supply Pty Ltd does not warrant that this product is suitable for any use or purpose. The user must ascertain the suitability of the product before use or application intended purpose. Preliminary testing of the product before use or application is recommended. Any reliance or purported reliance upon Chem-Supply Pty Ltd with respect to any skill or judgement or advice in relation to the suitability of this product of any purpose is hereby excluded. This product is not sold by description. Where the provisions of Part V, Division 2 of the Trade Practices Act apply, the liability of Chem-Supply Pty Ltd is limited to the replacement of supply of equivalent goods or payment of the cost of replacing the goods or acquiring equivalent goods.

2. Hazard Identification

GHS classification of the substance/mixture:
- Aspiration Hazard: Category 1

Signal Word (s): DANGER
Hazard Statement (s): H304 May be fatal if swallowed and enters airways.
Pictogram (s): Health hazard

Precautionary statement – Response:
P301+P310 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P331 Do NOT induce vomiting.

Precautionary statement – Storage:
P405 Store locked up.

Precautionary statement – Disposal:
P501 Dispose of contents/container to an approved waste disposal plant.

3. Composition/Information on ingredients

4. First-aid measures

Inhalation: If inhaled, remove from contaminated area to fresh air immediately. Apply artificial respiration if not breathing. If breathing is difficult, give oxygen. Get medical aid if cough or other symptoms appear.

Ingestion: Rinse mouth thoroughly with water immediately, repeat until all traces of product have been removed. DO NOT INDUCE VOMITING. Seek immediate medical advice.

Skin: Wash with plenty of soap and water. If irritation occurs seek medical advice.

Eye contact: If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes. If persistent irritation occurs, obtain medical attention.

First Aid Facilities: Maintain eyewash fountain and safety shower in work area.

Advice to Doctor: Treat symptomatically based on judgement of doctor and individual reactions of the patient.

Other Information: For advice, contact a Poisons Information Centre (Phone eg Australia 13 1126; New Zealand 0800 764 766) or a doctor.

5. Fire-fighting measures

Hazard from combustion products: Carbon monoxide, carbon dioxide.

Specific Methods:
- Small fire: Use dry chemical, CO2, water spray or foam.
- Large fire: Use water spray, fog or foam.
- If safe to do so, move undamaged containers from the fire area. Cool containers with flooding quantities of water until after the fire is out.

Specific hazards arising from the chemical: May be ignited by heat, sparks or flames. Oil will float on water and can spread any fire. Containers may explode when heated. Fire may produce irritating, poisonous or corrosive gases. Runoff may pollute waterways.

Precautions in connection with fire:
- Wear SCBA and structural firefighter's uniform.

6. Accidental release measures

Spills & disposal: Eliminate all ignition sources (no smoking, flares, sparks or flame) within at least 15m. Do NOT touch or walk through this product. Stop leak if safe to do so. Prevent entry into waterways, drains, confined areas. Water spray may be used to knock down or divert vapour clouds. Use clean non-sparking tools to collect material and place it into loosely-covered plastic containers for later disposal.

Clean-up methods - small spillages:
- Absorb or contain liquid with sand, earth or spill control material. Shovel up using non-sparking tools and place in a labelled, sealable container for subsequent safe disposal. Put leaking containers in a labelled drum or overdrum.

7. Handling and storage

Precautions for safe handling:
- Avoid contact with eyes, skin, and clothing. Avoid breathing gas/fumes/vapour/spray/mist. Avoid prolonged or repeated exposure. Wash hands after working with substance. Wash with soap and water before eating, drinking, smoking or using toilet facilities. Change contaminated clothing. Launder contaminated clothing before reuse. Properly dispose of contaminated leather articles (shoes) that can not be decontaminated. Use with adequate ventilation. Keep container tightly closed. Keep away from heat and all sources of ignition. Keep away from incompatibles such as oxidizing agents.

Conditions for safe storage, including any incompatibilities:
- Store in a tightly closed container. Store in a cool, dry, well-ventilated area away from incompatible substances. Keep away from heat, sparks, flames and high temperatures. Keep well closed and protected from direct sunlight and moisture. Protect against physical damage. Store separately from reactive or combustible materials. Store away from oxidizing agents.
- Do not store above 24 °C.

8. Exposure controls/personal protection
### Classified as hazardous

<table>
<thead>
<tr>

<th>STEL</th>
<th>TWA</th>
<th>Footnote</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paraffin liquid light</td>
<td>5 mg/m³</td>
<td>5 ppm</td>
<td>Oil mist, refined mineral</td>
</tr>
<tr>
<td>Paraffin liquid heavy</td>
<td>5 mg/m³</td>
<td>5 ppm</td>
<td>Oil mist, refined mineral</td>
</tr>
</tbody>
</table>

### Other Exposure Information

A time weighted average (TWA) has been established for Oil mist, refined mineral (Safe Work Australia) of 5 mg/m³. The exposure value at the TWA is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week.

### Appropriate engineering controls

In industrial situations maintain the concentrations values below the TWA. This may be achieved by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods.

### Respiratory Protection

Where ventilation is not adequate, respiratory protection may be required. Avoid breathing vapours or mists. Select and use respirators in accordance with AS 1716 - Respiratory Protective Devices and be selected in accordance with AS 1715 - Selection, Use and Maintenance of Respiratory Protective Devices. When mists or vapours exceed the exposure standards then the use of the following is recommended: Approved respirator with organic vapour and dust/mist filters. Filter capacity and respirator type depends on exposure levels.

### Eye Protection

The use of a face shield, chemical goggles or safety glasses with side shield protection as appropriate.

### Hand Protection

Hand protection should comply with AS 2161, Occupational protective gloves - Selection, use and maintenance. Recommendation: Nitrile rubber gloves

### Personal Protective Equipment

Final choice of personal protective equipment will depend on individual circumstances and/or according to risk assessments undertaken.

### Footwear

Safety boots in industrial situations is advisory, foot protection should comply with AS 2210, Occupational protective footwear - Guide to selection, care and use.

### Body Protection

Flame retardant protective clothing. Clean clothing or protective clothing should be worn, preferably with an apron. Clothing for protection against chemicals should comply with AS 3765 Clothing for Protection Against Hazardous Chemicals.

### Hygiene Measures

Always wash hands before smoking, eating or using the toilet. Wash contaminated clothing and other protective equipment before storing or re-using.

</tbody>
</table>
### Flammability
- **Combustible.**

### Auto-Ignition Temperature
- 260 to 371 °C

### Kinematic Viscosity
- < 30 mm²/s at 40 °C - light
- 63 - 70 mm²/s at 40 °C - heavy

### 10. Stability and reactivity

#### Chemical Stability
Stable under ordinary conditions of use and storage. May solidify at room temperature. Oxidation and peroxidation when it occurs in mineral oils continues almost at logarithmic rate.

#### Conditions to Avoid
High temperatures, excess heat, flames, ignition sources, sunlight or ultraviolet light and incompatibles.

#### Incompatible Materials
- Strong oxidizing agents.
- Carbon monoxide, carbon dioxide.

#### Decomposition Products
- Will not occur.

### 11. Toxicological Information

#### Toxicology Information
No adverse health effects expected if the product is handled in accordance with this Material Safety Data Sheet and the product label.

**Acute Toxicity - Oral**
- **LD50 (rat):** >5,000 mg/kg.
- May cause gastrointestinal irritation. Material is a cathartic and can cause serious diarrhoea and may cause gastrointestinal tract discomfort, abdominal cramps, nausea and vomiting. Ingestion is relatively non-toxic unless aspiration occurs. Exposure to a large single dose, or repeated small doses by inhalation, aspiration or ingestion leading to aspiration can lead to lipid pneumonia or lipid granuloma. These are low-grade, chronic localized tissue reactions which are not fatal.

**Inhalation**
- Causes respiratory tract irritation. Symptoms may include coughing, shortness of breath. Inhalation of mist or vapour may produce aspiration pneumonia, which is characterized by pulmonary edema and hemorrhage and may be fatal. Signs of lung involvement include increased respiratory rate, increased heart rate, and bluish discolouration of the skin. Coughing, choking and gagging are often noted at the time of aspiration. However, this product has a low vapour pressure and is not expected to present an inhalation hazard at ambient conditions. Caution should be taken to prevent aerosolization or misting.

**Skin**
- Prolonged and/or repeated contact may cause skin irritation, defatting of the skin and dermatitis. Chronic exposure may cause lung damage.

**Eye**
- Mists or fumes can irritate the eyes. Can cause discomfort similar to motor oil.

**Carcinogenicity**
- Not listed in the IARC Monographs.

**Aspiration Hazard**
- Maybe fatal if swallowed and enters airways.

**Chronic Effects**
- Prolonged use of paraffin oil may interfere with the absorption of fat-soluble vitamins. Chronic exposure may cause lung damage. Prolonged or repeated skin exposure may cause dermatitis or oil acne. Highly refined mineral oils are not classified as human carcinogens. However, related forms (untreated and mildly-treated oils) are listed as human carcinogens by both NTP and IARC.

**Mutagenicity**
- No evidence of mutagenic properties.

### 12. Ecological Information

#### Ecological Information
- No ecological problems are to be expected when the product is handled and used with due care and attention.
- This product is stable in water, and can be mechanically separated from water. The water may be suitable for disposal in a biological waste water treatment plant.

**Ecotoxicity**
- Quantitative data on the ecological effect of this product are not available.

**Persistence and degradability**
- White mineral oil will be inherently biodegradable in water under aerobic conditions, and will be ultimately biodegraded by micro-organisms (although the biodegradability of White Mineral Oil will necessarily be limited by its low solubility in water). Products of Biodegradation: Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

**Environmental Protection**
- Do not allow to enter waters, waste water, or soil!
13. Disposal considerations

**Disposal Considerations**

Whatever cannot be saved for recovery or recycling should be disposed of according to relevant local, state and federal government regulations.

14. Transport information

**Transport Information**

Not classified as a Dangerous Good according to the Australian Code for the Transport of Dangerous Goods by Road and Rail.

15. Regulatory information

**Regulatory Information**

Listed in the Australian Inventory of Chemical Substances (AICS).

**Packaging & Labelling**

Refer to the ‘Containers’ regulations for liquid hydrocarbons specified in the Commonwealth Department of Health and Aged Care, ‘Standard for the Uniform Scheduling of Drugs and Poisons No. 20’, Commonwealth of Australia, Canberra 2005.

16. Other Information

**Literature References**

'Standard for the Uniform Scheduling of Medicines and Poisons No. 6', Commonwealth of Australia, February 2015.
